

TACTICAL PILOTAGE CHART (TPC) SCALE 1:500 000

PURPOSE: TPC are designed to provide an intermediate scale translation of cultural and terrain features for flying at very low altitudes (below 500 feet above ground level), through medium altitudes or low level- high speed operations. Other uses include mission planning and analysis, intelligence briefings, and preparation of cockpit visual display graphics.

PROJECTION: Lambert Conformal Conic, based on two standard parallels within each 8 degree latitude band.

SIZE: 1460mm x 1057mm (57.5" x 41.6")

BASE DETAIL SHOWN.

CULTURE: Major towns and cities, railways, main roads, power transmission lines, pipelines, boundaries, and landmark features selected for rapid visual recognition from a low perspective angle.

HYDROGRAPHY: Detailed drainage with open water tints.

RELIEF: Basic contour interval is 500 feet with 250 feet intermediate contours in moderately level areas. Spot elevations are shown throughout the various elevation levels. Three dimensional relief shading, layer tints, and land forms significant to low altitude radar missions are also shown.

VEGETATION: Distinctive vegetation types (ie. mangrove and pine) shall be shown.

AERONAUTICAL OVERPRINT: Aerodromes, radio facilities, aeronautical lights, obstructions, maximum terrain elevations or maximum elevation figures, isogonals, marine lights and airspace reservations.

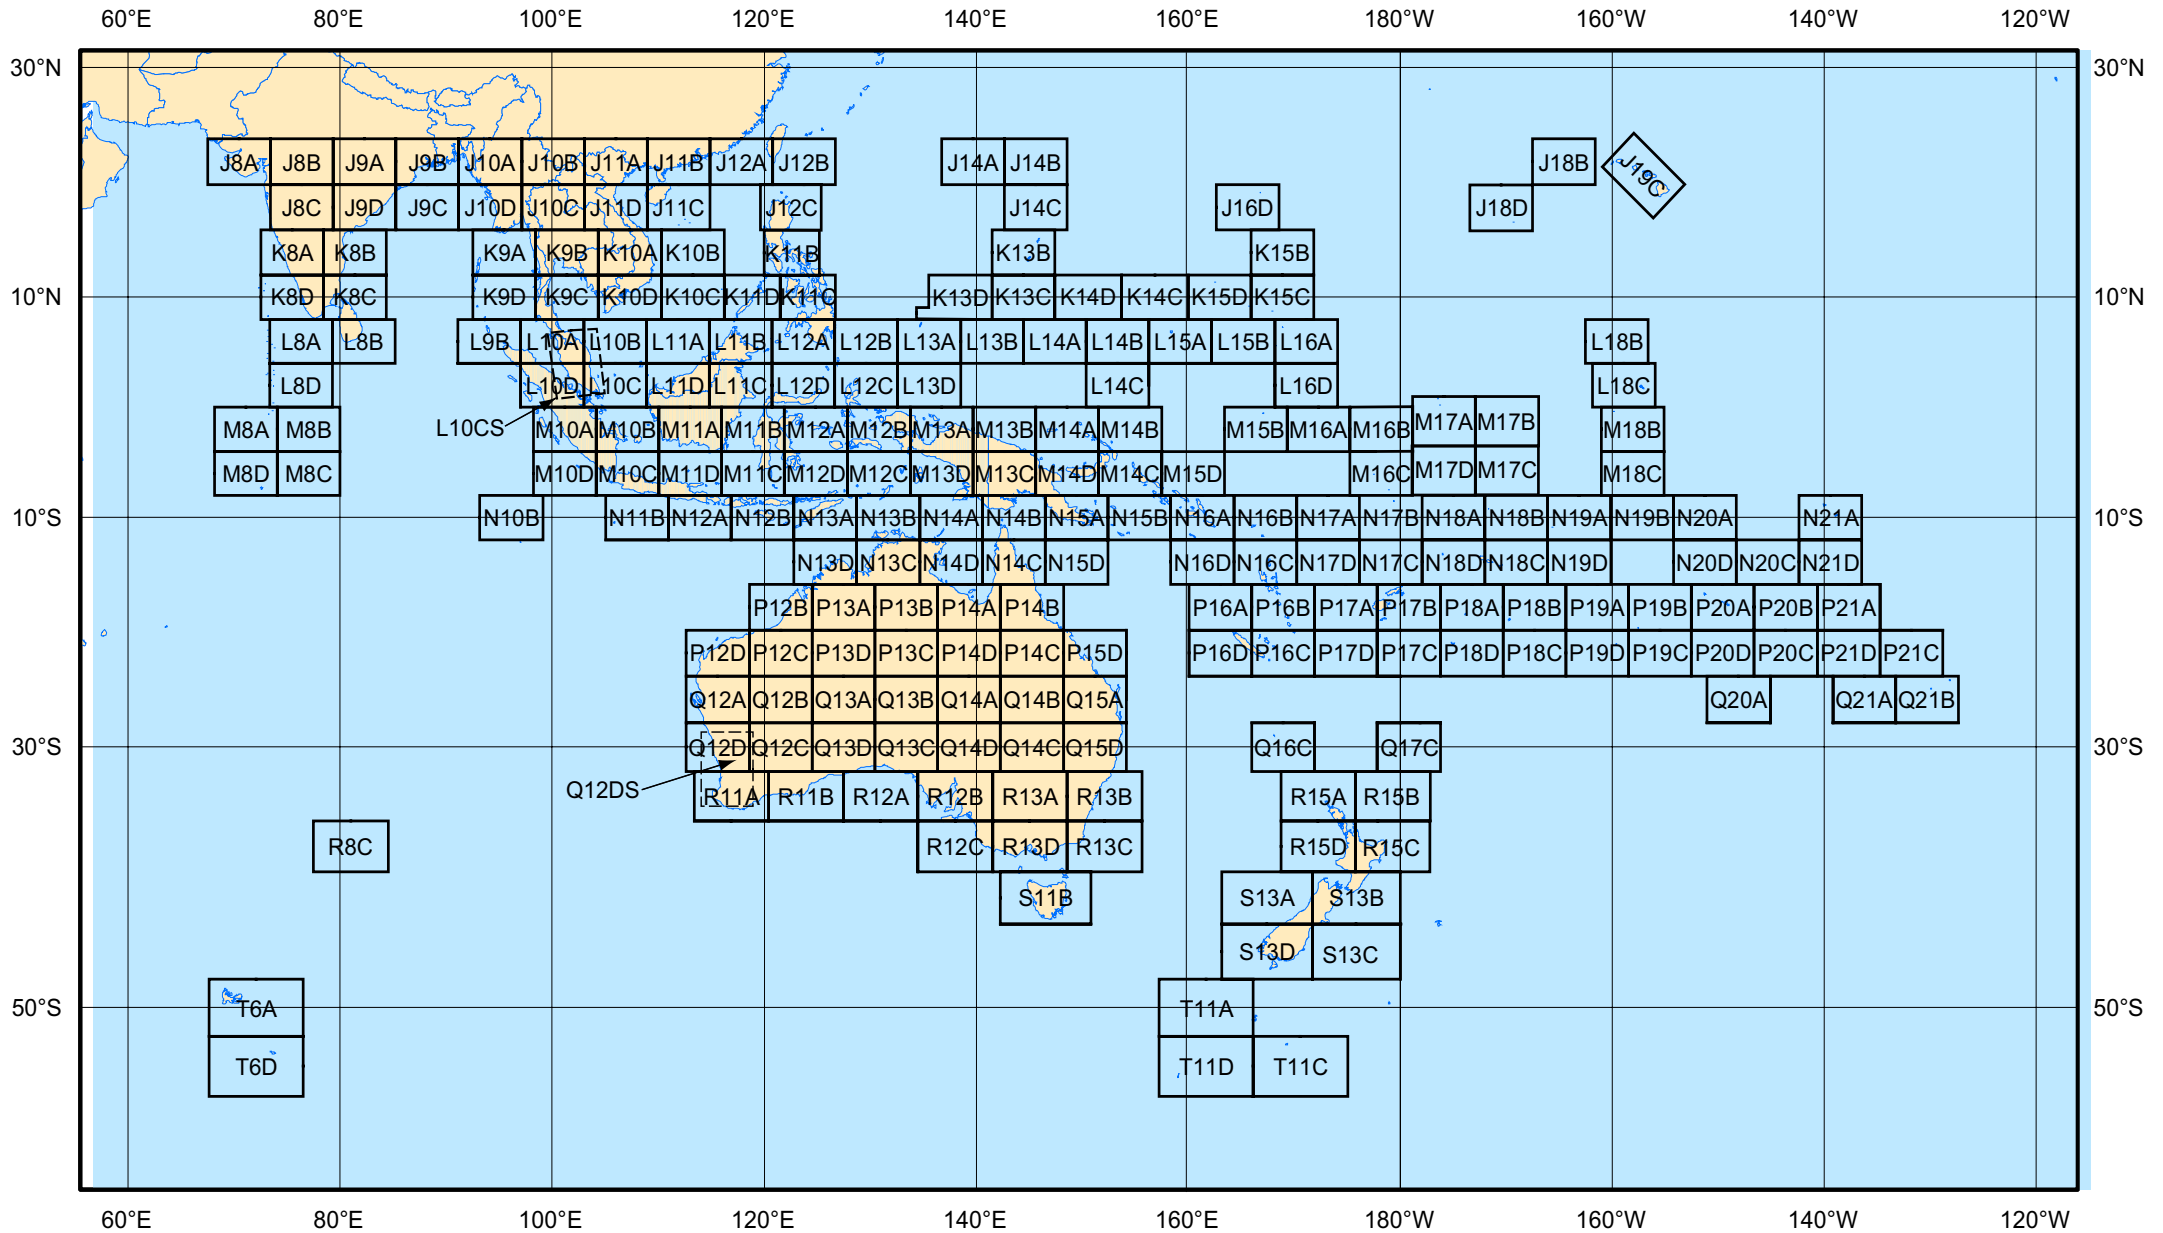

GEOGRAPHIC GRID: WGS84

GRID OVERPRINT: Universal Transverse Mercator and GEOREF system..

1:500 000
