

ERC SERIES INVENTORY

For information on the effective date of the charts check the front panel of the AIPAB.

All charts in the inventory are constructed using the Lambert Conformal Conic Projection with the exception of the charts marked # that are Oblique Mercator.

ADF FLIP ERC (HIGH/LOW)

PURPOSE: Pre-flight planning and in-flight navigation for use in conjunction with Enroute Supplement. ERC are designated as High or Low or High/Low. High charts generally depict navigation data for aircraft operating inter- country or between major ports. Note: Use of the navigation data shown on High charts covering the Australian FIR is restricted to use by aircraft operating at or above FL200. Low charts generally depict navigation elements for aircraft operating intra-country. High/Low charts depict combination of High and Low navigation information.

SCALE: Various (see ERC Series Inventory)

PROJECTION: Lambert Conformal Conic

SIZE: 1143mm x 508mm (45" x 20")

BASE DETAIL SHOWN.

CULTURE: Nil

HYDROGRAPHY: Coastline, major lakes and rivers.

RELIEF: Nil

VEGETATION: Nil

AERONAUTICAL OVERPRINT: Comprehensive information on radio navigation facilities, route structures, isogonals, LSALTs, and Special Use Airspace. High charts include grid LSALTs.

GRID OVERPRINT: Nil
